AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

- 1. (Canceled)
- 2. (Currently Amended) The pivotable collecting device of claim 45, wherein the supporting sides converge at the supporting edge.
- 3. (Currently Amended) The pivotable collecting device of claim $4 \underline{5}$, wherein the first axis is parallel to a longitudinal axis of the supporting edge.
- 4. (Currently Amended) The pivotable collecting device of claim 45, wherein the supporting sides are substantially parallel to one another.
- 5. (Currently Amended) The A pivotable collecting device of claim 1 for handling a folded sheet material, comprising:

a supporting edge for supporting a fold of the folded sheet material; two supporting sides opposing one another;

means for pivoting the supporting edge and supporting sides about a first axis
to receive the folded sheet material such that each supporting side receives a
different portion of the folded sheet material; and

a collecting drive for at least one of: clamping the folded sheet material against at least one of the supporting sides, and advancing the folded sheet material along the at least one supporting side.

- 6. (Previously Presented) The pivotable collecting device of claim 5, wherein: the collecting drive is rotatably mounted on at least one mounting side, and the at least one mounting side is arranged substantially perpendicular to the supporting sides.
- 7. (Previously Presented) The pivotable collecting device of claim 5, wherein the collecting drive rotates based on a pivoting movement of the supporting edge and supporting sides.
- 8. (Previously Presented) The pivotable collecting device of claim 5, wherein the collecting drive rotates based on at least one of a biasing element and contact between the collecting drive and a redirection area.
- 9. (Previously Presented) The pivotable collecting device of claim 5, wherein the collecting drive rotates about a second axis parallel to the first axis.
- 10. (Currently Amended) The pivotable collecting device of claim 4 5, comprising:

means for deflecting the folded sheet material onto at least one of the supporting sides.

11. (Currently Amended) The pivotable collecting device of claim 4 5, wherein the pivotable collecting device comprises:

means for aligning the folded sheet material on the supporting edge.

12. (Currently Amended) The pivotable collecting device of claim 4 <u>5</u>, wherein the pivotable collecting device comprises:

means for staple clinching.

13. (Currently Amended) The pivotable collecting device of claim 4 <u>5</u>, wherein the pivotable collecting device comprises:

means for ejecting the folded sheet material from the supporting edge.

- 14. (Canceled)
- 15. (Currently Amended) The method of claim 44 17, wherein the receiving step includes pivoting the pivotable collecting device in a second direction to receive the first portion of the folded sheet material.
- 16. (Currently Amended) The method of claim 44 <u>17</u>, comprising the step of:

deflecting the first portion of the folded sheet material onto the first supporting side of the collecting device.

17. (Currently Amended) The A method of claim 14 for transferring folded sheet material, comprising the step of:

receiving a first portion of the folded sheet material on a first supporting side of a collecting device;

supporting a fold of the folded sheet material on a supporting edge of the collecting device;

pivoting the pivotable collecting device in a first direction such that a second supporting side of the pivotable collecting device receives a second portion of the folded sheet material, wherein the first and second supporting sides are opposing sides of the collecting device; and

clamping the first portion of the folded sheet material against the first supporting side of the collecting device.

18. (Currently Amended) The method of claim 44 <u>17</u>, comprising the step of:

advancing the first portion of the folded sheet material along the first supporting side of the collecting device.

19. (Currently Amended) The method of claim 44 <u>17</u>, comprising the step of:

locking the pivotable collecting device when a desired amount of folded sheet material is received by the pivotable collecting device.

20. (Canceled)

21. (Currently Amended) The A pivotable collecting device of claim 20 for handling a folded sheet material, comprising:

a supporting edge for supporting a fold of a folded sheet material; two supporting sides opposing one another;

means for pivoting the supporting edge and supporting sides about a first axis to receive the folded sheet material such that each supporting side receives a different portion of the folded sheet material, wherein the supporting sides converge at the supporting edge, and the first axis is parallel to a longitudinal axis of the supporting edge; and

a collecting drive for at least one of: clamping the folded sheet material against at least one of the supporting sides, and advancing the folded sheet material along the at least one supporting side.
